

May 8, 2015

To: All Valued PVC Electrical Fitting Customers

Royal Building Products will be adjusting list prices and multipliers on all PVC electrical fittings and components effective June 8, 2015.

Please be advised that there are major adjustments across all product categories reflecting significant increases and decreases affecting the net price.

We are eliminating the wide array of multipliers used currently and will apply a single multiplier for the entire Price List.

Multipliers will be applicable pursuant to annual account purchases, geographical location and other factors and will be communicated to all accounts, account managers and rep agencies prior to the effective date.

A new Electrical Solutions Pricing File will be uploaded to the website and a printed version will follow for distribution as soon as possible.

Orders received at current prices will be limited to 1/12th of the last twelve month purchases per customer and must be placed prior to June 8th for immediate shipment.

We thank you for your past patronage and look forward to servicing your PVC fitting requirements in the future.

Sincerely,

A handwritten signature in black ink, appearing to read "Chad Hall", written in a cursive style.
